

# HAMBLETON BIODIVERSITY ACTION PLAN

ANNEX A

## Acknowledgements

The preparation of the Hambleton BAP would not have been possible without the involvement of many individuals and organisations. These include the naturalists who have recorded wildlife in the District, members of the steering group and members of the partnership who have offered advice. They also include English Nature, North Yorkshire County Council and Hambleton District Council for the funding and Graham Megson, the North Yorkshire County Council Biodiversity Officer, who led the project.
