Paragraph 2.9	At this stage of writing, in May 2019, prior to engagement as part of the Publication Draft Local Plan, it is important to note that the IDS represents a work in progress. The draft IDP will be part of the background documents that assist in understanding how the development set out in the Local Plan will be delivered. It therefore forms part of the consultation on the publication version of the Local Plan. Any new information that is received that assists in developing or updating the IDP will be incorporated into future iterations of the IDP leading ahead of submission of the Local Plan to the secretary of state for examination. <u>It is important to note that the IDS represents a work in progress. It has been informed by the comments received during the representations period for the Publication Draft Local Plan and will be updated and revised as necessary through the local plan examination process. The draft IDP will be part of the background documents that assist in understanding how the development set out in the Local Plan will be delivered. It therefore forms part of the consultation on the publication version of the Local Plan. Any new information that is received that assists in developing or updating the IDP will be incorporated into future iterations of the IDP leading ahead of submission of the Local Plan to the secretary of state for examination.</u>	Change to reflect consultation.
